LITTLE LAKES
MACHINE & TOOL CO.

LITTLE LAKES MACHINE & TOOL CO.

Precision Crafted Tooling and Parts.

Little Lakes delivers precision solutions to meet your exact and demanding requirements. We are experts in the creation of Flow Forming tooling, Powder Metal tooling and Aerospace Communication components, just to name a few. We enjoy unique challenges and pride ourselves on creative problem solving to convert your ideas and requirements into reality.

World Class Machinery.

Haas Schleifmaschinen Form Grinders, Makino Hard Milling Machines, Fanuc Wire EDM's, Makino Sink EDM's. Little Lakes has a full suite of the world's most advanced machinery and equipment to deliver the precise tolerances and quality you require.

Quality Facilities and Systems.

18,000 square feet of ultra clean, climate-controlled production space is coupled with a disciplined QA environment supported by the latest equipment including CMMs, contracers and optical comparators.

ISO9001:2015 Certified

Capable, Creative People.

The Little Lakes' team is comprised of more than 20 Machine Specialists and Engineers with the know-how and experience to turn your ideas and specifications into reality.

Serving the World's Most Demanding Industries.

Automotive

Automotive part companies have turned to Little Lakes for more than 25 years to deliver exact tooling used in high volume parts manufacturing.

Aerospace

The Aerospace industry demands highly complex machined parts and relies on Little lakes to deliver custom-built components such as horn antennas for microwave communications satellites.

Energy

Alternative energy companies count on Little Lakes to deliver custom built tooling used in the production of solid oxide fuel cells.
